-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 12-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the telephone conversation with James Duzan on December 14, 2005.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,617,681 to Bohr in view of Applicant's Admitted Prior Art (AAPA) and in view of EP472768A and JP11006073A. Bohr describes an interposer for use between a chip and substrate. Bohr particularly describes (column 11, last paragraph) an interposer formed of a silicon substrate coated with silicon oxide. AAPA discloses well known semiconductor die and carrier substrate package fabrication and describe ([0007], [0008], [0012], [0013]) well known use of lasers in fabrication comprising resist removal, trimming, scribing, drilling, etc. The use of the known interposer material disclosed by Bohr with the fabrication steps known in the art and disclosed in AAPA would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because it provides suitable thermal expansion characteristics to

the structure. EP472768A and JP11006073A describe well known laser roughening and the use of a rough surface in the fabrication would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because it provides better adhesion. Note that method limitations in article claims do not clearly define article claim structure.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Norskov and Machino describe well known interposers.
